

Course 02: Brainstorming & Planning

Comprehensive Learning Guide & Practical Prompting Playbook

MODULE OVERVIEW

Unlock creative ideation and strategic roadmapping with AI. Learn techniques like SCAMPER, 6 Thinking Hats, tree-of-thought prompting, and milestone breakdown to transform raw, vague ideas into actionable execution plans.

KEY LEARNING TOPICS

- Divergent vs. Convergent Ideation Frameworks
- Socratic Dialogue & Multi-Perspective Brainstorming
- Project Scoping & Work Breakdown Structures (WBS)
- Risk Assessment & Mitigation Mapping

PROMPTING STRATEGY & ARCHITECTURE

Use iterative, multi-turn prompting. Start wide for high-volume idea generation, then enforce strict filtering criteria to refine down to actionable plans.

ROLE

You are a Senior Product Strategist and Agile Coach.

TASK

Generate 5 innovative web application feature concepts for an event management platform, then develop a high-level sprint roadmap for the best concept.

CONTEXT

The platform targets local community organizers who need seamless ticketing and venue allocation.

STEPS

1. List 5 unique feature ideas focusing on automation and attendee engagement.
2. Evaluate each idea on Feasibility (1-5) and Impact (1-5).
3. Select the top-scoring idea and break it into a 3-sprint implementation plan (2 weeks per sprint).

OUTPUT FORMAT

- Section 1: Feature Matrix (Markdown Table)
- Section 2: Selected Idea Rationale
- Section 3: Sprint Roadmap with epics, key tasks, and deliverables.

BEST PRACTICES & PRACTICAL TIPS

- Prompt the AI to ask clarify questions **before** generating final plans.
- Use perspective shifts: 'Evaluate this plan from the standpoint of a Skeptical Investor / End User / Developer.'
- Ask for step-by-step logic (Chain-of-Thought) to ensure realistic timeline estimates.
